

If you believe a video required to contain captions doesn't have captions available, you can [submit a complaint](#).

Change a video's language settings

Each movie and TV show on Google Play Movies & TV will have different language availability for audio playback and captions (subtitles).

Find language and caption details

You can find information about a video's available languages and captions on a movie or TV show's detail page.

[On your computer](#) ▼

Select a different audio language

When a video has multiple audio languages available, you can change your preferred language while the video streams. From the Google Play Movies & TV Settings menu, you can also set up default language settings that will be used across all videos you rent or purchase.

Keep in mind not all titles are offered with multiple audio options.

Change your caption (subtitle) settings

When captions are available, you can turn them on or off during playback. If a video has captions available in many languages, you'll also be able to choose a language. From the Google Play Movies & TV Settings menu, you can select default language settings that will be used for all videos you rent or purchase.

Some videos may have captions that can't be removed.

To select a different language for subtitles:

1. Near the bottom of your video player, touch the Audio Language and Captions icon .
2. On the "Captions" menu, select a language from the list.
3. Tap **OK**.

[From the Google Play Movies & TV Settings menu](#)

1. Open the Google Play Movies & TV app .
2. Tap Menu  **> Settings > Caption settings**.
3. Follow the on-screen instructions to turn subtitles on and off, select a language, or update the text size.
